

PRESS RELEASE

Updates on Nurses' Salary Payment and Medical Officers' Posting.

1. The Ministry of Health wishes to inform the public that over 6,000 newly recruited nurses have received their salaries, covering the full cohort of 13,500 nurses recruited nationwide. The Ministry assures all stakeholders that all outstanding administrative matters will be duly addressed.
2. The Ministry also commends the newly posted medical officers who have reported to their designated duty stations.
3. Those who have not yet reported are kindly requested to do so by **Friday, 12th December 2025**. This extended deadline is intended to provide all remaining officers with adequate opportunity to report, as part of ongoing efforts to ensure a fair and balanced distribution of the health workforce across the country.
4. The Ministry of Health wishes to reiterate that the postings are not punitive, but rather an essential measure to achieve equitable deployment of health professionals.
5. Families and relatives of the newly posted medical officers are encouraged to support them in accepting and settling into their assigned postings, especially in the underserved areas.
6. The Ministry wish to re-emphasise its commitment to work with Stakeholders in providing incentives for officers posted to the rural and underserved areas, in line with the Ministry's Human Resource Posting Guidelines.
7. In this regard, we call on Metropolitan, Municipal, and District Chief Executives (MMDCEs) to support by providing key incentives, such as accommodation, transport support, and other basic amenities, to help attract and retain medical officers and other health professionals in their respective districts.
8. The Ministry further emphasises that no changes will be made to the recent postings.

9. The Ministry of Health remains committed to strengthening Ghana's health workforce and ensuring equitable delivery of quality healthcare services across all regions.
